Dear Dave

**John Lewis Partnership - Basement Command and Control
171 Victoria Street, London SW1E 5NN**

Following the successful completion of the Emergency Command and Control Room at Victoria Street I would like to formally thank you and your site team for an excellent installation.

I attended a formal hand-over to JLP Corporate Facilities on Friday 15 April 2005 and was not only congratulated on the contract by the Facilities management team but also by their 'client' who expressed their thanks for completing the project to a first class standard within timetable and budget. I can only endorse their comments. This would not have been possible without the practical approach and attitude of your site team; in particular Colin Benn, Ross Gieseg, Jacob Kniaz and Mark Winterflood.

I look forward to working with you again on future projects for John Lewis in full confidence that the standards you have set will ensure a similar response from the client.

Yours sincerely

G Stickings
